

RICH-y®

GrandeTex new innovation in synthetic yarn.

The self-benefits of this yarn are durable anti-bacteria, anti-odor, UV protection & wicking function. Without any extra chemical treatment during dyeing process - No water pollution concern.

Aiming at "REACH" standard is GrandeTex principle always.

Anti-UV

Anti-odor

Anti-bacterial

Wicking

Rich-y® added liquid transition elements into raw material, then yarn spinning already has anti-UV, anti-bacteria itself. Besides, because of anti-bacteria, so its odor free with benefit as well.

Also have wicking and cooling element adding together to have more benefit from yarn.

- Anti-UV • Anti-Odor • Anti-Bacteria •
- Wicking • Cool/Thermal - alternative •

This yarn is long lasting effect without any chemical adding during dyeing process. As its non-dissolving type, won't have wash out worries or water pollution.

For winter collection, we change cooling to thermal elements to give variety selection for customer. Base layer would be a great option for sports, active, golf wear customer to feel the nice performance while wearing it.

Rich-y® innovate in synthetic yarn of Rich Nylon, Rich Polyester and **ECO RICH-y®** by using recycle PET material. In 2020, GrandeTex innovated **Rich-y® + Solution Dyed** with more environmentally friendly and anti-bacterial and gives better color fastness.

Maximize the effect of the **RICH-y®**, create product differentiation, and provide customers with more options.

ECO RICH-y®
