Comfort through Performance

**H.one**  
COMFORT THROUGH PERFORMANCE

H-OneTex Co., Ltd. is a well-established fabric manufacturer for Active sportswear, Mountaineering, Athleisure and Yoga wear in Seoul, Korea since 2009.

We produce a wide range of circular and warp knits which make customers satisfied in aspect of excellent and advanced quality of fabrics, and focus on development based on customers' needs.

Our aim is to give comfort through our performance fabric.

# About Us

Keep working as an Eco-inventor

H-OneTex Co., LTD is a well-established performance fabric supplier which keeps working as an Eco-inventor for sustainability.

Our office is located in Seoul, Korea, and our mills take around one hour driving from our office.

We specialize in producing Recycled long pile fleece, High performance softshell, Anti-micro plastic high tech fleece, Jersey with natural fiber story and Recycled warp knit for Mountaineering, Ski, Running, Hiking, and etc.

Based on our experience over 20 years in this field, we are proud of satisfying customers in aspect of advanced quality with sustainable story.

# Mission & Vision

H-OneTex Co., Ltd has responsibility for all environmental pollutions like water, sea, soil, and air in nature which is literally now being destroyed.

We have serious obligation to solve environmental destruction, and always think about how we can make Earth much healthier with our customers.

We have specific mission to get solutions that protect the environment, and vision to make it happen.

We have been changing virgin fabric into recycled yarns from PET, Tencel from wood, wool and hemp from nature and biodegradable fibers.

However, we never forget to achieve perfect quality with excellent performance fabrics and sustainability which is satisfying our customers until now.

# Our Products

## Dri release Wool

HTF-4085

89% POLYESTER 7% WOOL 4% ELASTANE

As warm as 100% wool without the itch

Feel gentle on the skin

Nature fiber

Machine Washable

## Dri release Cotton

HTF-4086

88% RECYCLED PES 9% ORGANIC COTTON  
3% ELASTANE

Remove perspiration quickly

Natural hand feel

Patented permanent performance

Won't easily shrink or lose shape

## Dri release Hemp

HTF-4110

42% RECYCLED PES 49% PES 5% HEMP  
4% SPANDEX

Feels like cotton, easy to care, natural hand feel

Good resistance to shrinkage

natural wicking and fast drying technology

Effectively manage moisture from the skin

# Our Product

## Lenzing / Tencel

HS-8159

95% TENCEL 5% ELASTANE

Circular Jersey with TENCEL™ and Elastane  
Long-lasting natural handfeel which keeps your body pleasantly dry with natural comfort and easy care. Moisture absorption, and body's natural thermal regulation. Sustainable and Biodegradable.

## Smartfiber / Seacell

HS-8217

50% RECYCLED POLYESTER 27% COTTON  
18% SEACELL 5% ELASTANE

Seacell from Seaweed which comes from a unique ecosystem, and is especially rich in minerals, proteins, and vitamins, nourish for your skin, feeling incredibly soft.

## Askin / Aqua function

HS-8105 / HS-161

86% POLYESTER (ASKIN) 14% ELASTANE  
35% NYLON 52% PE(ASKIN) 13%ELASTANE

Quick drying, UV Protection with no transparency  
Cool touch makes feel smooth and comfortable still in summer.  
Good abrasion, pilling and snagging resistance.

# Our Product

## Biodegradable

HTF-4112

59% RECYCLE PES 35% PES (bio-degradable)  
6% ELASTANE

Anti-microplastic tech fleece for the marine environment. Designed to prevent micro plastic in ocean. Used recycled polyester on surface and bio-degradable polyester from Nan Ya ([www.npc.com.tw](http://www.npc.com.tw)) on brushed back. Micro plastic from brushed back is degradable in months.

## Recycled Nylon

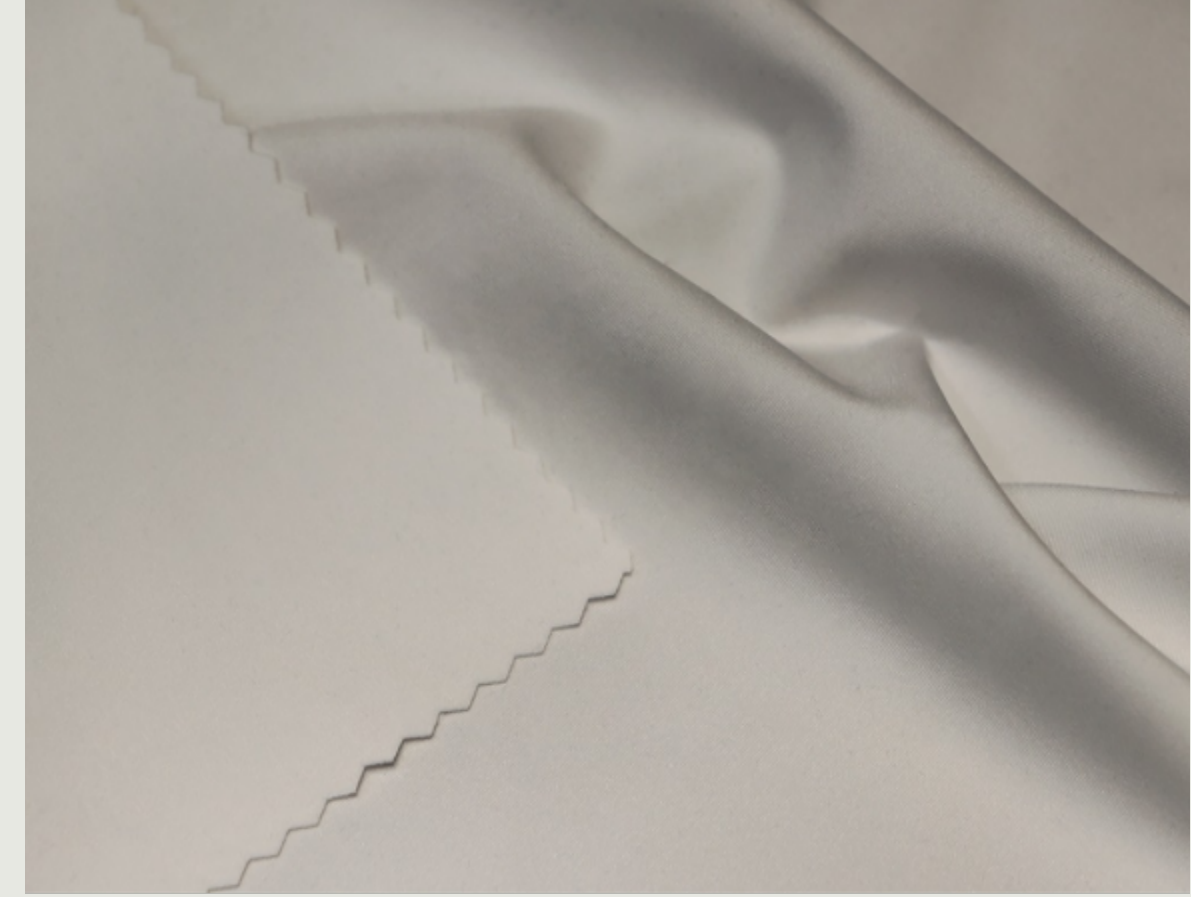

HTS-7100

80% RECYCLED NYLON 20% ELASTANE

Warp knit with high pilling and abrasion resistance. 4-way stretch with comfort and light weight. Recycling pre-consumer waste like old finishing nets, conserving petroleum resources which are a great solution to divert garbage from the ocean.

## High Guage

HD-9086 / HD-9087

65% NYLON 35% ELASTANE  
67% POLYESTER 33% ELASTANE

High Guage double knit. Good durability with high pilling and snagging resistance which gives you 4-way stretch with comfort and light weight.

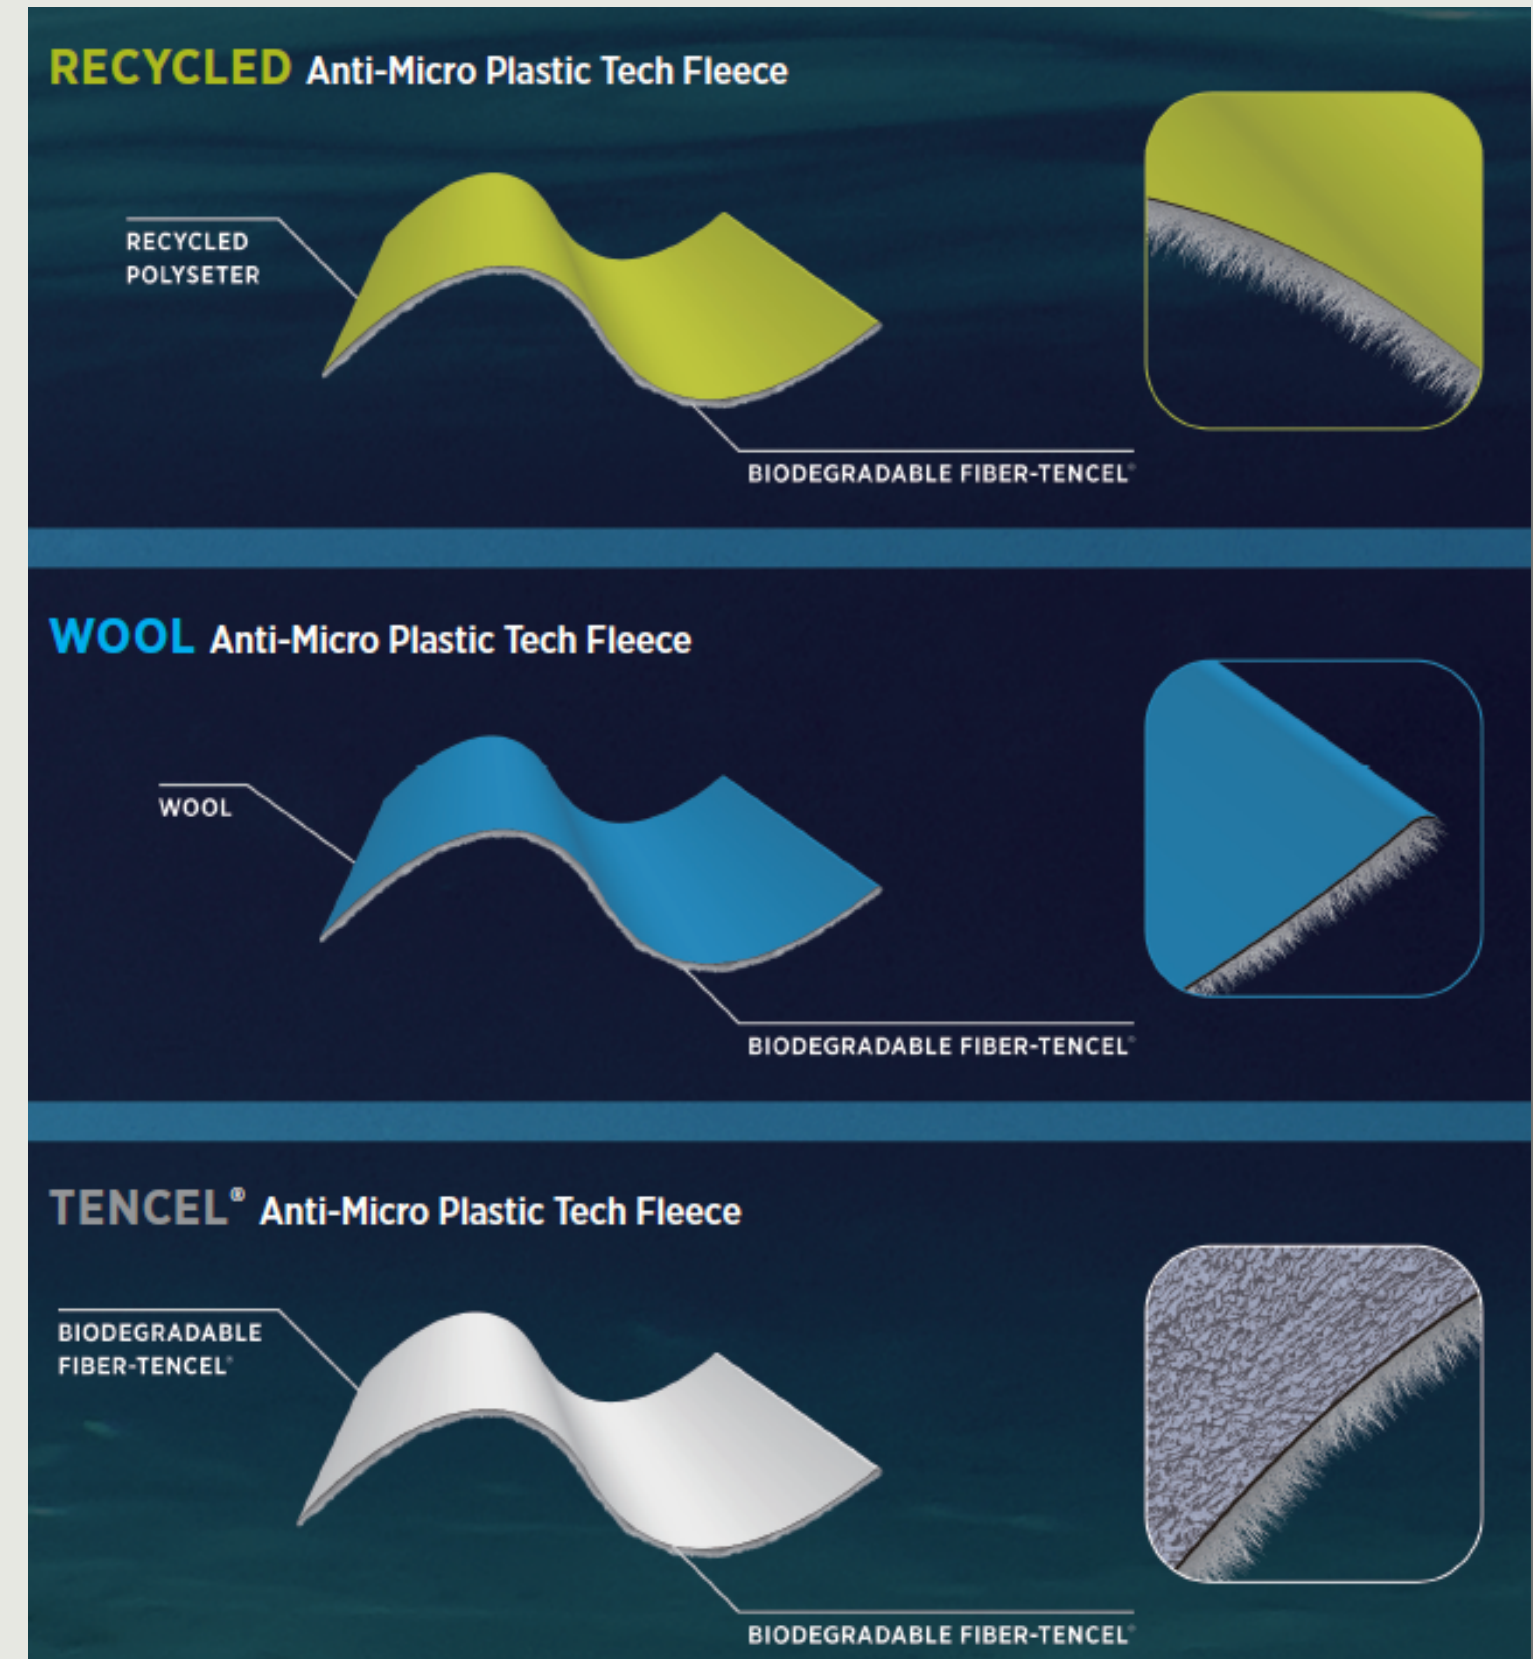

# Biodegradable : Anti-micro plastic

HTF-4080-5

Micro plastic pollution is a global problem with disastrous effects on marine life.

700,000 micro fibers are released per garment in a single wash. Microscopic pieces of plastic are flushed down the drain with many reaching beaches and oceans where they can remain for hundreds of years. They will transition up the food chain, and finally end up on our plates because many of fishes swallow. Micro fibers from fabric should be designed to be degraded when they are washed. H-One Tex developed Anti-Micro Plastic Tech Fleeces to avoid any dangerous micro plastics in the environment. That can protect seas and marine eco-system.

Brushed side of fleece is composed of 100% biodegradable fiber-Tencel from Lenzing. Tencel® is the first fiber to be certified as biodegradable in marine water. When the micro fibers are released from its brushed side during a washing process, they will be decomposed without residue in about 3 months. 100% recycled polyester is used on surface which has high abrasion and pilling resistance. These performances are essential for sportswear.

# Meet directly with you

We've been participating Performance Days and ISPO since 2011. Until now, we meet various kinds of customers from fairs and get good relationship. This is the "motivation" of H-OneTex which keeps all customers satisfied with high quality fabrics. We'd like to meet you everywhere in your life via fairs and your clothes.

“

# COMFORT THROUGH PERFORMANCE

Be Friend with Sustainability
